Cempedak St., Tanjungpinang City.

ABOUT ME

Undergraduate students who have experience developing Full stack Javascript Websites especially MERN, are very passionate about working with teams to learn and grow together and have a useful impact

---

EXPERIENCE

SKILLVUL   **Aug 2023 - Present**
Full-Stack Web Development Intern

- build and implement product development, UI/UX designers, frontend and backend make products about education

INFINITE LEARNING   **Jan 2023 - July 2023**

Red Hat Linux and Hybrid Cloud & AI

- implement how to operate the Linux system, create networks, containers, manage storage, manage SELINUX security and much more

DINAS PENDIDIKAN KOTA TANJUNG PINANG   **Sep 2022 - Dec 2022**
Full Stack Developer

- The Tanjungpinang City Education Office previously needed a Development Team to work on building an application to help students when they moved to a new school or another school. I built Backend Web Apps for Schools and the Education Office of Tanjungpinang City, created an API by connecting the mongodB database, and integration from the backend API to the frontend and deployed the website.

FAKULTAS TEKNIK INFORMATIKA   **Jan 2022 - Feb 2022**
Mobile Developer

- build a mobile-based application, namely an application to scan barcodes for lab use attendance systems

---
